

## **SalesForce Platform Manager**

### **About the Job**

Seeking a strategic and technical **Salesforce Platform Manager** to oversee the health, scalability, and release integrity of the Salesforce ecosystem.

### **What you'll do**

- This role serves as the primary custodian of environments, ensuring production stability while architecting a modern, federated development strategy and establishing a Center of Excellence to enable product teams to deploy code safely.
- As platform lead, responsibility includes managing the full lifecycle of Salesforce releases.
- Including major seasonal updates and continuous CI/CD pipelines using Copado.
- And supporting the streamlining of release management and testing environments for Salesforce, Agentforce, and Data Cloud.
- Continuous growth in technical skills and Salesforce platform knowledge is expected, including learning and adopting new Salesforce products and technologies as they are implemented.

### **What you'll need**

- 5+ years of experience in Salesforce Platform Management or Salesforce Architecture.
- Tools: Expert-level proficiency with Copado for CI/CD and release orchestration.
- Technical Depth: Deep understanding of the Salesforce multi-tenant architecture, governor limits, and environment management.
- Communication: Proven ability to translate complex technical releases into business-friendly roadmaps.
- Problem Solving: Experience managing "Business Critical" production environments and working directly with Salesforce's premier support tiers.
- Work in the Salesforce.com development environment which includes custom objects, workflows, triggers, SOQL & SOSL.
- Apply best practices and design patterns to build applications on the Force.com platform.
- Work independently with minimal supervision.

### **Preferred Skills:**

- Data Cloud: Hands-on experience with Salesforce Data Cloud (ingestion, modeling, and activation) is highly desirable.

- 
- Certifications: Salesforce Certified Development Lifecycle and Deployment Designer or Salesforce Certified Platform App Builder/Admin.
  - Develop high-quality, scalable applications with Visualforce, Apex, and Lightning frameworks (Aura and/or LWC), as well as declarative and configuration-driven development.
