Professional Summary

Strategic and technical **Salesforce Platform Manager** with 6+ years of experience **overseeing Salesforce ecosystem health, scalability, and release integrity** across healthcare, retail, banking, and financial services domains. Expert-level proficiency with **Copado for CI/CD and release orchestration**, deep understanding of **Salesforce multi-tenant architecture, governor limits, and environment management**, and proven track record managing **full release lifecycles** including major seasonal updates and continuous delivery pipelines. Experienced architecting **federated development strategies**, establishing **release governance frameworks**, and managing **business-critical production environments**. Hands-on technical depth across **Apex, LWC, Aura, Visualforce, SOQL, SOSL, custom objects, workflows, and triggers**. Proven ability to translate complex technical releases into **business-friendly roadmaps** and work independently with minimal supervision.

Professional Experience

Senior Salesforce Platform Manager and DevOps Engineer

October 2019 – March 2026

NTT Data – Hyderabad, India

FinSure Financial Services (Apr 2025 – Mar 2026) | Tools: Copado, GitHub Actions, Salesforce DX, Apex, LWC, SOQL, Jira

- Served as **primary custodian of Salesforce environments**, managing full lifecycle of Dev, QA, UAT, and Production orgs including Sandbox refresh cycles, Scratch Org configurations, and org health monitoring to ensure production stability.
- Architected and managed **Copado CI/CD pipelines and release orchestration** for continuous delivery of Salesforce changes, enforcing branching strategies, promotion paths, and automated validation gates – reducing deployment cycle time by 35%.
- Developed **Apex classes, triggers, Queueable Apex, and Batch Apex** for high-volume financial workflows, applying **Force.com best practices and design patterns** with governor limit compliance and 90%+ test coverage.
- Built **Lightning Web Components (LWC)** and Aura components integrated with Apex controllers and REST APIs, delivering scalable modern UIs for customer-facing and internal financial applications.
- Implemented **secure authentication and credential management** using JWT-based OAuth and environment variables, enforcing security best practices across all CI/CD pipeline integration points.
- Established **release governance standards, SOPs, and technical documentation**, translating complex technical releases into business-friendly roadmaps for stakeholder and leadership visibility.
- Delivered **knowledge transfer and platform enablement** to 10+ developers on Copado, Salesforce DX, and DevOps best practices – reducing team escalations by 50% within 3 months.

HSBC (Sep 2023 – Mar 2025) | Tools: Copado, Salesforce DX, Git, Apex, LWC, Aura, SOQL, Salesforce CLI, Jira

- Led **Salesforce platform management** for a multi-region global banking ecosystem, overseeing platform health, release integrity, and environment strategy across Dev, SIT, UAT, Pre-Production, and Production environments.
- Managed **full release lifecycle using Copado** including major seasonal Salesforce updates, continuous CI/CD pipelines, and emergency hotfix deployments – delivering 50+ releases with zero unplanned production outages over 18 months.
- Architected **federated development strategy and branching governance** across multi-region parallel development teams, resolving metadata conflicts and enforcing promotion paths aligned with HSBC's enterprise standards.
- Managed **business-critical production environment** for a global banking platform, working directly with Salesforce Premier Support tiers to resolve platform-level issues and ensure compliance with banking regulatory requirements.
- Applied **Force.com best practices and design patterns** across Apex development, LWC delivery, and declarative configuration, ensuring scalable, maintainable solutions within Salesforce's multi-tenant architecture.
- Developed **SOQL and SOSL queries** for data retrieval, reporting, and integration workflows, optimizing query performance within governor limit boundaries for a high-volume banking CRM.
- Enforced **release governance and compliance controls** through Copado approval workflows and audit traceability, enabling zero-finding results on all internal and external banking compliance audits over 18 months.

CVS Health (Apr 2021 – Aug 2023) | Tools: Gearset, Salesforce DX, GitHub, Apex, LWC, SOQL, Salesforce CLI, Jira

- Managed **Salesforce platform operations and release cycles** for a large-scale CRM supporting pharmacy, retail, and customer engagement, overseeing environment strategy and deployment governance across 20+ concurrent development streams.
- Designed and maintained **Gearset CI/CD pipelines** with automated Apex test execution and static code validation, reducing production defect escape rate by 30% and deployment time by 25% across quarterly releases.

- Developed **Apex, LWC, and Visualforce** solutions applying Force.com design patterns, governor limit best practices, and platform architecture principles for a high-volume retail healthcare CRM.
- Wrote complex **SOQL and SOSL queries** for bulk data operations, integration workflows, and reporting, ensuring query optimization and bulkification within Salesforce governor limit constraints.

Philippines Health Digital Care Platform (Nov 2019 – Mar 2021) | Tools: Flosum, Salesforce DX, Apex, SOQL, Change Sets, Git, Jira

- Managed **Salesforce platform health and release integrity** for a national-scale public healthcare platform, overseeing environment configurations, Sandbox management, and deployment governance across the full delivery lifecycle.
- Implemented **Flosum CI/CD pipelines** replacing manual Change Set deployments, establishing the foundational **Center of Excellence framework** for structured, scalable Salesforce releases across NTT Data engagements.
- Applied **Force.com best practices** for Apex development, declarative configuration, and custom object design, ensuring platform scalability and compliance with Salesforce multi-tenant architecture principles.

Education

Bachelor of Commerce (B.Com)

July 2018

Osmania University – Hyderabad, India

Skills

Platform Management: Salesforce Ecosystem Health and Governance, Environment Management, Release Lifecycle Management, Production Stability, Federated Development Strategy, Center of Excellence Establishment, Seasonal Salesforce Update Management

CI/CD and Release Orchestration: Copado (Expert), Gearset, Flosum, GitHub Actions, Salesforce DX (SFDX CLI), Salesforce CLI, Branching Strategies, Promotion Paths, Automated Validation, Rollback and Hotfix Execution

Salesforce Architecture: Multi-Tenant Architecture, Governor Limit Optimization, Force.com Design Patterns, Salesforce Data Model, SOQL and SOSL, Custom Objects, Workflows, Triggers, Declarative Configuration

Development: Apex (Classes, Triggers, Batch, Queueable, Future Methods), Lightning Web Components (LWC), Aura Components, Visualforce, REST and SOAP API Integration, JWT-based OAuth

Security and Compliance: Salesforce Security Model, Profiles and Permission Sets, Sharing Rules, Field-Level Security, Release Governance, Audit Readiness, Regulatory Traceability

Leadership and Communication: Technical Roadmap Communication, Stakeholder Enablement, Developer Mentorship, Cross-Functional Collaboration, Agile Delivery, Technical Documentation, Independent Execution

Certifications

- **Salesforce Certified Administrator** – Salesforce
- **Salesforce Certified Advanced Administrator** – Salesforce
- **Copado Fundamentals I** – Copado

Key Achievements

- **Copado Release Mastery:** Managed 50+ end-to-end Salesforce releases at HSBC using Copado across 5 environments with zero unplanned production outages over 18 months, including major seasonal updates and continuous CI/CD delivery.
- **Production Environment Ownership:** Served as primary custodian of business-critical Salesforce environments across 4 enterprise engagements, maintaining production stability and escalating directly with Salesforce Premier Support at HSBC.
- **Federated Development Architecture:** Architected multi-region branching strategies and promotion path governance at HSBC, enabling parallel development across global banking teams with zero metadata collision incidents.
- **Zero-Finding Compliance:** Enforced Copado-based release governance and audit traceability at HSBC, enabling the platform to pass all internal and external banking compliance audits with zero findings over 18 months.
- **Center of Excellence Foundation:** Established foundational CI/CD framework, release governance SOPs, and developer enablement programs at FinSure and Philippines Health platform – adopted as the standard across NTT Data Salesforce engagements.
- **Deployment Quality:** Implemented automated Apex test gates and validation pipelines at CVS Health, reducing production defect escape rate by 30% and average deployment time by 25% across quarterly releases.
