Senior Salesforce Developer with 7+ years of experience designing and delivering scalable, secure, and high-performance Salesforce solutions across enterprise environments. Strong expertise in Apex, Lightning Web Components, Flow-first architecture, integrations, and large data volume (LDV) optimization. Proven ability to lead end-to-end Salesforce implementations, improve system performance, and mentor development teams while maintaining production stability.

Core Skills

- **Salesforce Architecture:** Apex, LWC, Integrations, LDV, Async Processing
- **Automation:** Flow-first design, Trigger frameworks, Platform Events
- **Integration:** REST, SOAP, Named Credentials, External Services
- **DevOps:** Git, Copado, SFDX, CI/CD, Branching strategy
- **Performance:** LDV, indexing, query optimization, async design
- **Security:** Sharing architecture, FLS, Role hierarchy, Org-wide design
- **Tools:** Data Loader, Workbench, Metadata API, Inspector (reloaded).

Work Experience

IBM (Nov 2021 – Present):

Informa (Application Developer)

- Led end-to-end delivery for Salesforce org with 1500+ users across Sales & Service Cloud (design → development → deployment) using Copado .
- Designed and implemented **scalable Apex frameworks** (Triggers, Batch, Queueable, Schedulers) with strict governor-limit compliance.
- Built **Flow-first architectures**, strategically replacing legacy Workflow & Process Builder automations, reducing technical debt.
- Developed reusable **Lightning Web Components** for improved UX and performance.
- Optimized org performance for **large data volumes (LDV)** using indexing strategies, selective queries and async processing.
- Built test data factory & reusable test framework enabling stable deployments with 90%+ coverage across 500+ classes.
- Designed data models including **custom objects, relationships, validation rules and security architecture**.
- Conducted peer-code reviews, enforced Salesforce best practices and ensured long-term maintainability.
- Mentored 5 developers, improved code review quality and reduced deployment defects by 30%.
- Acted as production owner, handling critical defects and release stability.

Tata Consultancy Services (Oct 2018 – Nov 2021):

Genworth Financial (Salesforce Developer)

- Developed Apex Triggers, Classes and Test Classes using SOQL/SOSL.
- Implemented automation using **Flows, Workflow Rules and Process Builder**.
- Built **asynchronous solutions** (Batch, Queueable, Future, Scheduler) for bulk data processing.
- Analysed and fixed production issues during releases and post-deployment.
- Identified security gaps and application vulnerabilities through testing and debugging.

DuPont de Nemours (Salesforce Developer/Administrator)

- Supported day-to-day Salesforce operations including user issues and data management.
- Developed Apex solutions aligned with business requirements.
- Designed and managed **sharing rules, permission sets and access controls**.
- Performed **quarterly archival and deletion of millions of records** using Data Loader and Workbench to maintain org performance.

Certifications

- Salesforce Certified Platform Developer I
- Salesforce Certified Administrator
- Salesforce Certified Platform App Builder
- Salesforce Certified Business Analyst
- Salesforce Certified AI Specialist
- Salesforce Certified AI Associate
- Salesforce Certified Associate
- Copado Fundamentals I & II
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Media & Entertainment Insights and Solutions (IBM – Bronze)

Education

- B.Tech in Electronics and Communication Engineering (2014-2018)
