## PROFESSIONAL SUMMARY

Salesforce DevOps Engineer with 5 years of experience designing scalable CI/CD pipelines, automating release processes, and managing enterprise Salesforce deployments in high-availability environments. Strong expertise in Jenkins, GitHub Actions, Copado, SFDX, and Git-based version control. Proven track record of reducing deployment time, improving release stability, and implementing secure DevOps practices. Passionate about automation, clean release governance, and building reliable DevOps frameworks aligned with product engineering standards.

---

## TECHNICAL SKILLS

DevOps & CI/CD: Jenkins, GitHub Actions, Copado, Gearset, Flosum, DevOps Center  
Version Control: Git, GitHub, Bitbucket  
Salesforce: SFDX, Salesforce CLI, Metadata API, Profiles, Permission Sets, Org Strategy  
Automation & Scripting: YAML, XML, Shell Scripting, OpenSSL, JWT Authentication  
Quality & Security: Checkmarx, PMD, Apex Testing, Static Code Analysis  
Build & Deployment Tools: Ant Migration Tool  
Agile & Collaboration: Scrum, JIRA, Confluence  
Platforms & Tools: VS Code, Linux, Salesforce Inspector, Workbench, Data Loader

---

## PROFESSIONAL EXPERIENCE

Capgemini  
DevOps Engineer  
May 2025 – Present | Chennai, India

### Key Contributions:

- Designed and implemented scalable Github Action CI/CD pipelines for Salesforce SFDX projects.
- Built GitHub Actions workflows for branch-based release management and pull-request validations.
- Implemented incremental deployment strategy, reducing deployment time by 30–40%.
- Automated authentication using JWT and AuthURL for secure non-interactive deployments.
- Integrated static code analysis and validation steps into CI pipeline to enforce quality gates.
- Managed metadata deployments using Ant Migration Tool and Salesforce CLI.
- Reduced production deployment failures through automated validation and pre-deployment testing.

Tools: Jenkins, GitHub Actions, SFDX, Salesforce CLI, Git, Bitbucket, Ant, Linux, YAML, XML, DevOps Center.

---

Tata Consultancy Services (TCS)

Salesforce DevOps Engineer / Release Engineer

January 2021 – May 2025

Key Contributions:

- Owned end-to-end Salesforce release lifecycle using Copado across Dev, QA, UAT, and Production environments.
- Configured and maintained Copado pipelines, version control integration, and automated promotion workflows.
- Managed branching strategies and resolved merge conflicts to ensure clean deployments.
- Enforced deployment governance, quality checks, and security scans using Checkmarx and PMD.
- Executed Apex test classes and ensured minimum code coverage compliance.
- Administered Salesforce org security including profiles, permission sets, login IP policies, and environment management.
- Coordinated with product owners, QA, and engineering teams to deliver predictable sprint releases.
- Improved deployment success rate by implementing structured validation and rollback strategies.

Environment: Copado, Salesforce, Bitbucket, Git, Checkmarx, Salesforce CLI, VS Code, JIRA, Confluence.

CERTIFICATIONS

Salesforce Certified Administrator

Salesforce AI Associate

Copado Fundamentals I

Copado Fundamentals II

Copado Certified Consultant

Gearset Fundamentals Certificate

Flosum Certified Professional

---

EDUCATION

Bachelor of Technology (B.Tech.)

Electrical and Electronics Engineering

SRM Institute of Science and Technology (2016 – 2020)

---

ACHIEVEMENTS

Best Performer Award – Recognized for successful and timely enterprise release delivery

Special Achievement Award – Process improvement and release optimization

Learning Achievement Award – Continuous upskilling in DevOps tools
