

Career Objective:

Over 4.2 years of experience in Automotive domain as a embedded software engineer.
Excellent reputation for resolving problems and on time customer software deliveries.

Professional Summary:

- Proficient in **C Programming, Embedded C, Autosar Architecture and BSW Integration.**
- Expertise in **Vector Davinci Configurator or ETAS ISOLAR-A/B .**
- Expertise in **CANoe,CANape,CANalyzer,PSDiag.**
- Hands on experience with communication protocols like **CAN,UDS(14229),SPI,I2C,UART.**
- Expertise in Version Control Systems like **PTC Integrity(Windchill or MKS),IQM,AzureDevops.**
- Expertise in **OS Runnable and RTE Configuration.**
- Experience in tools like **Tasking(Tricore), iStar (Eclipse), Pure Variants handling.**
- Expertise in **CI/CD in Jenkins.**
- Experience in **Comstack,DEM,NVM Configuration in Autosar.**
- Experience with **Renesis R1X and Infineon (TC2xx)** Microcontrollers and **RTOS.**
- Working experience with **Doors, ALM, RTC-SCM, ClearQuest,VectorCast,GCM.**
- Working experience with **Gliwa T1.**
- Knowledge on Complete SDLC of V-Model with quality standards **ASPICE and ISO 26262(Functional Safety).**
- Familiarity with **HIL environments** and **ECU Simulation/Debugging.**
- Preparation of Integration Test Bench and make it to run.

Working Experience:

- 3.2 years of experience in **Brigisha Technologies Pvt Ltd** Client is **Bosch Global Software Technologies Pvt Ltd** as a Embedded Software Engineer.
- 1 year experience in **Neotech Global Pvt Ltd** client is **ZF India Pvt Ltd** as a Software Integration Engineer .

Career Profile:

1. Project:

Title: Air Bags

Environment: Embedded C, Windchill(PTC Integrity), Base Configuration Tool (ToolBase Configuration), iStar (Eclipse), PSDiag, CANoe.

Customer: VW&JLR

Role: SW Integrator

Description:

The scope of the project is to design and develop Vehicle features consists of airbag. Which are deployed during accident to provide protection to driver and passenger and Event Data Recorder (EDR) to store information during and after the crash.

2. Project:

Title: Steering

Environment: Embedded C, Windchill(PTC Integrity), Vector Davinci Configurator,IQM,Azure pipelines, CANoe,CANalyzer,CANape,Gliwa T1.

Customer:Zeeker CM1e

Role: Senior SW Integrator

Description:

The scope of the project is to design and develop Vehicle features consists of Steering. Steering system is the key interface between the driver and the vehicle , that system converts rotary movement of the steering wheel into angular movement of the front wheels.it multiplies drivers effort by mechanical advantage ,enabling him to turn the wheels easily.

Responsibilities:

- COM stack configuration and provide interfaces to user.
- Customer specific requirements implementation from design phase to unit testing.
- Coordinating Integration activity & complete software baseline releases (CSW) for planned milestone & delivery.
- Responsible for provide support to the development teams to identify the cause of failure during CI.
- Execution of Integration & baseline acceptance test(BAT) including static & dynamic test's & measurement of resource consumption for Integrated software.
- Responsible for project setup & initial build configuration pre/post build steps of new projects.
- Responsible for prepare integration test bench for testing and make it to run.
- Responsible for Compilation and linking processes.
- Responsible for run the bat files and execute testcases and maintain the scripts.
- Debug skills to identify the root cause in case of build failure.
- Responsible for analyze result files like(.map,.hex,.sad) to find RAM and ROM Usage.
- Responsible for variant handling,Branch Creation & software Configuration.
- Responsible for Enabling CBT for Continues build test.
- Good Experience with Vector DaVinci tool for RTE configuration and port configuration.
- Good experience with GLIWA T1 for real time task execution and system load.
- Good Experience in involving several Change Control Board(CCB)/IA and Change Requests.
- Verification & validation of Hex dump received from plant for first produced ECU & provide verification report for software correctness.
- Unit & Integration Testing.
- Software Migration within M Lines and Child Problem Integration.
- Worked on Problem Analysis, defect & defect fixes-development activities.
- Good know-how on SDLC (V model) process & understanding on ASPICE methodology.
- Good Experience in using Next gen tool support such as Prototyping, etc.
- Planning and Prioritizing the deliveries along with delivery managers .

Awards:

- Spot award,2024-Brigosha technologies.
- STAR award 2025- ZF INDIA Pvt Ltd.

Educational Details:

- Bachelor of Technology in Electronics and Communication Engineering Stream from JNTU Anantapur in 2020.

Language Known:

- English
- Telugu

Declaration:

I believe that the information given in this application is true and correct. I request you to please accept my application and give me an opportunity to render my best services to the company.
