PROFILE

Passionate to work with maximum potential in a challenging and innovative environment, with an opportunity of working with a diverse group of people and enhance my professional skills with learning and experience.

PROFESSIONAL SUMMARY

- Data engineer having 6.2 years of experience in designing, implementing, and supporting different big data applications by using **Python, Apache Spark(pyspark), AWS, GCP, Dataflow, GCS and Hadoop.**
- Having extensive experience with **Spark SQL, Spark core, Oracle, and MySQL.**
- Having strong experience in all Hadoop and Spark ecosystems including **Hive, Datawarehouse, Bigquery.**
- Familiar with List, Set, Dictionary, String Concepts in Python.
- Having experience in all stages of the project including requirements gathering, designing and documenting architecture, development, data extraction, and reporting.
- Exposure to AWS Cloud technologies such as **EC2, S3, EMR, RDS & IAM.**
- Good hand in programming languages such as **Python in cloud9.**
- Worked on **big, structured, and non-structured** datasets.
- Worked in **Agile Development Model.**
- Focus on customer satisfaction and drive results by being a team player and individual contributor with good collaboration skills as well.
- A good team player, fluent communicator currently working with Advantmed India LLP.
- Focus on customer satisfaction and drive results by being a team player and individual contributor with good collaboration skills as well.

SKILLS AND ABILITIES

- **Big Data:** Hadoop, MapReduce (MR), HDFS, Hive, Sparks
- **Programming Languages:** Python
- **Big Data Tools:** HDFS, Hive, Sparks, Sqoop, HiveQL, Redshift, athena
- **Databases:** Oracle. Postgre SQL, MySQL
- **Cloud Technologies** AWS Services : EMR, S3, EC2, IAM, RDS, AWS Glue & GCP Services: BigQuery, GCS, Dataproc, Cloudstorage, Lookerstudio, Dataflow
- **Scripting & Query Languages:** Shell Scripting, SQL, Python, HQL.
- **Environment:** Unix, Linux, Windows
- **Software Tools:** Oracle server, MySql, Putty, WinSCP, Git, Github
- **Domain Worked:** Telecom, BANKING, HealthCare
- **IDE:** Pycharm, Cloud9, Jupyter Notebook

WORK EXPERIENCE

Siemens Ltd, *Data Engineer*

05/2024 – present | India

Project Name:- Environmental Sustainability Reporting

Roles and Responsibilities:

- Understanding customer business requirements and preparation of mapping by analyzing data flow and evaluating transformation and data fixes.
- Worked on development, enhancement, and support in data ingestion, and data migration.
- Written spark, Glue jobs to extract records from downstream sources.
- Work closely with the business and analytics team in gathering the system requirements.
- Export and Import batch data and delta into S3 using PySpark, Glue and Lambda Function
- Reconciled data like count, duplicate, null and RI and generated daily reports.
- Job execution monitoring, debugging, and bug fixing.
- Job automation using shell scripting and Airflow.

Technologies used:

AWS Glue, Lambda Function, S3, CloudWatch, Stepfunction, Athena, Cloud9, PySpark, Python, SQL

Capgemini, *Data Engineer*

05/2023 – 05/2024 | India

Project: Sales and Marketing Data Reporting

Roles and Responsibilities

- Transform data into insights to inform Sales and Marketing business decision making.
- Data Ingestion from source using dataflow.
- Creation of Tables as per the specification, Ingestion of data Into puddle using Bigquery, Framing SQL query logic to extract the data from raw, silver and Bronze layer and make data available in Gold layer for the business teams.

Technologies used:

GCP -BigQuery, Dataproc, Cloud composer, Looker studio.

ABB India Limited, *R&D Associate Engineer*

01/2021 – 04/2023 | India

Project Name - Banking Domain

Roles and Responsibilities:-

- Understanding customer business requirements and preparation of mapping by analyzing data flow and evaluating transformation and data fixes.
- Worked on development, enhancement, and support in data ingestion, and data migration.
- Written spark, hive jobs to extract records from downstream sources.
- Work closely with the business and analytics team in gathering the system requirements.
- Export and Import batch data and delta into HDFS, HBase and Hive using PySpark.
- Involve in creating Hive tables, loading with data, and writing Hive queries.
- Reconciled data like count, duplicate, null and RI and generated daily reports.
- Analyzed data in the data warehouse.
- Job execution monitoring, debugging, and bug fixing.
- Job automation using shell scripting and Airflow.

Technologies and Skills:

Spark, HBase, Hive, RDBMS, S3, EMR.

Project Name - BOSCH-Operations Data Hub

Roles and Responsibilities:-

- Imported structured data from RDBMS to HDFS using Sqoop and performed transformation.
- Process data in HDFS by developing solutions analyzing data using spark, and Hive and producing summary results into Hadoop.
- Written Sqoop queries to extract updated records.
- Work closely with the business and analytics team in gathering the system requirements.
- Fine-tune Hadoop applications for high performance and throughput.
- Design and implement column family schemas of Hive and HBase within HDFS.
- Created hive schemas using performance techniques like partition and bucketing.

Technologies and Skills:

HDFS, Oracle, Sqoop, Hive, MapReduce, Airflow

 EDUCATION

Bachelors Degree of Mechanical Engineering,

2015 – 2019 | Pune, Maharashtra

Sinhgad College of Engineering, Vadgaon

CGPA: 9.04

 PERSONAL DOSSIER

- Name : Pratik Balasaheb Raut
- Date of Birth : 09th August 1997
- Address : Yashodanagar, Pipeline road, Savedi, Ahmednagar 414003
- Languages : English,Hindi, Marathi

 DECLARATION

I hereby declare that all information furnished above is true to the best of my knowledge and belief.

Pratik Balasaheb Raut
