Senior iOS Engineer · Swift · SwiftUI · Scalable Architecture · Performance Optimization · 9+ Years Experience

PROFESSIONAL SUMMARY

Senior iOS Engineer with **9+ years of experience** in mobile application development, specializing in Swift, SwiftUI, and Objective-C. Proven expertise in designing scalable, high-performance iOS applications across eCommerce and healthcare domains. Strong track record in architectural decision-making (MVVM, Clean Architecture, Modular Architecture), performance optimization, CI/CD pipeline integration, and App Store deployment. Experienced in Agile/Scrum delivery, mentoring engineers, and delivering measurable business outcomes through code quality and security best practices.

TECHNICAL SKILLS

Languages: Swift, SwiftUI, Objective-C

Frameworks & Libraries: UIKit, Combine, CoreData, CoreBluetooth, Firebase, Twilio, WatchOS, VisionOS

Architecture Patterns: MVVM, MVC, VIPER, Clean Architecture, Modular Architecture

Concurrency: Swift Concurrency (async/await), Grand Central Dispatch (GCD), Thread Safety

Networking & Security: RESTful APIs, JSON Parsing, SSL Pinning, Jailbreak Detection, OAuth 2.0

Testing: XCTest, Swift Testing, XCUITest, Unit Testing, UI Testing, TDD

Tools & DevOps: Xcode, Instruments, SonarCloud, SwiftLint, Git, GitHub/GitLab, Jira, Postman

Dependency Management: Swift Package Manager (SPM), CocoaPods

Deployment: App Store Connect, TestFlight, CI/CD Pipeline Integration

Methodologies: Agile, Scrum, Code Review, Pair Programming, Technical Documentation

WORK EXPERIENCE

Senior Software Engineer — iOS

May 2025 – Present

Stryker · Bangalore

- Led large-scale migration of legacy **Objective-C modules to Swift and SwiftUI**, reducing technical debt and improving code maintainability and feature delivery velocity
- Architected **multi-module SPM-based architecture** with dependency injection (FactoryKit/AppState), enabling independent module development and scalable team workflows
- Designed and enhanced **internal networking framework** covering API orchestration, authentication token handling, error mapping, and structured logging
- Built **adaptive SwiftUI components** supporting iPhone, iPad, and macOS using size classes, scenes, and platform-specific optimizations — reducing UI code duplication by ~30%
- Enforced code quality and security standards using **SonarCloud, SwiftLint**, static analysis, and continuous code review
- Leveraged **Swift Concurrency (async/await)** and MVVM to deliver thread-safe, testable, and performant feature modules

SDE 3 — Senior iOS Engineer

Oct 2021 – Nov 2024

MindMaze / Day2Day Health / Babylon Health · Bangalore

- Integrated **Razorpay payment SDK** for in-app transactions, streamlining checkout workflow and improving payment processing efficiency by **25%**
- Redesigned **FHIR (Fast Healthcare Interoperability Resources)** data filtering and processing pipeline, improving healthcare data accuracy and patient record retrieval performance
- Developed new screens using **SwiftUI**, modernizing the UI layer and improving responsiveness, accessibility, and visual consistency across iOS versions
- Built a reusable **data-binding layer using Combine publishers**, eliminating boilerplate code and improving reactive data flow and maintainability
- Implemented **SSL Pinning and Jailbreak Detection** to harden application security, protecting sensitive health data against MITM attacks and unauthorized access
- Implemented **localization for 5+ languages**, expanding international reach and improving onboarding experience across diverse markets
- Improved **app accessibility** via VoiceOver support, dynamic text scaling, and adherence to Apple's Accessibility Guidelines

Shiprocket (Omuni) · Bangalore

- Architected **multi-brand white-label iOS app system** using modular architecture, enabling rapid deployment across multiple retail partner brands
- Built personalized home feed and recommendation experience, improving user engagement and retention
- Developed scalable product filtering, search, and dynamic pricing modules, optimizing product discovery and reducing load times
- Integrated **push notifications** and deep linking for targeted user re-engagement campaigns

SDE 1 — iOS Developer

Dec 2016 – Jan 2019

Lenskart · Bangalore

- Implemented customer review and rating system on product detail pages, improving product trust signals and conversion rates
- Built **image-based product discovery** (frame scan feature) using CoreML, enhancing the mobile shopping experience
- Revamped post-purchase order confirmation flow, improving user satisfaction and post-purchase engagement
- Gained foundational expertise in **UIKit, RESTful API integration, CoreData, and App Store Connect** deployment workflows
